Precision in Every Plastic

Welcome Message

Hello There,

At Nagendra Plast, we believe precision and consistency define manufacturing excellence. With decades of experience in plastic injection moulding, we specialize in producing high-quality industrial plastic components for OEM and custom applications.

Our focus is simple - deliver reliable products, maintain strict quality control, and build long-term partnerships. From small batch production to high-volume manufacturing, we ensure repeatability, traceability, and performance in every component.

We thank you for your trust and look forward to growing together.

PRAKASH RAMACHANDRAPPA
Founder and Managing Director

About Company

Established in 1993, Nagendra Plast is a precision plastic components manufacturer serving industrial, electrical, dental, and customized OEM applications. Based in Bengaluru, Karnataka, India, the company has built a strong foundation in controlled manufacturing and dependable supply over more than three decades of operation.

Nagendra Plast operates under a structured Quality Management System designed to meet customer, statutory, and regulatory requirements.

With capabilities supporting both domestic and international customers, Nagendra Plast supplies precision-moulded plastic components manufactured to defined specifications and application requirements. The company's approach emphasizes process stability, traceability, and long-term reliability, supporting customers across diverse engineering and industrial sectors.

Our Mission

To manufacture reliable plastic components that meet customer, statutory, and regulatory requirements by applying controlled processes, continual improvement, and responsible manufacturing practices.

Our Vision

To be a trusted global manufacturing partner, delivering precision plastic components through disciplined processes, consistent quality, and responsible operations.

Our Commitment

Nagendra Plast is committed to quality-driven manufacturing, workplace safety, and environmental responsibility. We strive to minimize waste, use resources efficiently, and continuously improve our processes to support sustainable growth and long-term customer confidence.

Service Offerings

Plastic Injection Moulding

Precision injection moulding performed under well-defined processes to ensure **consistency**, **dimensional accuracy** and **repeatability** across batches.

OEM & Custom Support

We work with **customer designs** and specifications, providing manufacturing solutions for both custom parts and ongoing OEM production requirements.

Quality & Traceability

Structured inspection systems and **batch traceability processes** that deliver confidence in quality and compliance.

Export-Ready Supply

Support for documentation and compliance with regulatory requirements such as **REACH**, **RoHS** and material declarations, enabling international supply readiness.

4-Step Work with Us

A Step-by-Step Guide from Quote to Delivery

Step 1

Request a Quote

Begin by sending your 2D or 3D drawings along with detailed specifications. Our team will thoroughly review your submission and provide a transparent, comprehensive quotation tailored to your project needs.

Step 2

Order Confirmation

Once you confirm your order, we proceed to finalize all technical details. This includes agreeing on tolerances, selecting appropriate materials, and scheduling production planning to ensure all requirements are met.

Step 3

Production

Production commences using controlled injection moulding processes. We pay close attention to maintaining consistent quality and repeatability throughout the manufacturing cycle, ensuring that every component meets the agreed standards.

Step 4

Inspection and Delivery

Upon completion, all finished components undergo thorough inspection. They are then carefully packed and delivered according to the agreed schedule and technical requirements, ensuring you receive your products on time and to specification.

Key Differentiators

At **Nagendra Plast**, our strength lies in disciplined manufacturing, long-term experience, and a commitment to controlled processes. With over three decades of practical production expertise, we focus on stability, repeatability, and precision in every batch. Our systems are built around quality control, defined inspection methods, and structured operations, ensuring that every component delivered meets customer specifications consistently and reliably.

The main reasons why you must choose our services.

30+ Years of Manufacturing Expertise

Extensive production experience enabling stable moulding processes, material understanding, and consistent output across industrial and OEM applications.

Quality-Controlled & Process-Driven Production

Defined inspection systems and controlled manufacturing methods ensuring dimensional accuracy, batch traceability, and repeatable performance.

Reliable Delivery & Long-Term Partnerships

Planned production schedules, disciplined operations, workplace safety practices, and sustainable resource usage, building customer trust through dependable, on-time supply.

OEM & Custom Manufacturing Precision

Components produced strictly as per customer drawings, tolerances, and specifications — supporting both custom projects and long-term OEM supply.

Applications

Medical and Dental Components

Nagendra Plast manufactures precision plastic components used in medical and dental equipment assemblies. Production processes are controlled to ensure dimensional accuracy, material consistency, and reliable performance. Components are developed according to customer specifications, supporting equipment manufacturers who require stable quality and repeatable supply.

Construction & Installation Parts

Nagendra Plast produces plastic components used in construction and installation applications, including fastening and support systems. Products are designed to offer durability, structural reliability, and consistent material performance. Controlled manufacturing ensures dependable supply for large-scale and recurring projects.

Industrial & OEM Components

The company supplies plastic components for a wide range of industrial machinery and OEM applications. With a structured manufacturing approach, parts are produced strictly as per technical drawings and tolerances. Stable production planning and quality-controlled processes enable consistent output for long-term industrial partnerships.

Customer-Specific & Custom Parts

The company develops and manufactures custom plastic components tailored to specific customer requirements. From concept review and drawing analysis to full-scale production, each project is executed with defined process controls and inspection standards. This approach ensures that custom solutions meet functional, dimensional, and quality expectations consistently.

Thank you for taking the time to learn about Us!

For more than three decades, **NAGENDRA PLAST** has remained committed to disciplined manufacturing, consistent quality, and dependable supply. Our focus is to support customers with precision plastic components manufactured to defined specifications and reliable production standards.

We value long-term partnerships built on transparency, technical understanding, and mutual growth. Whether supporting ongoing OEM production or developing customer-specific components, we remain dedicated to delivering stable and consistent results.

We look forward to the opportunity to collaborate and contribute to your manufacturing needs.
